

COMMERCIAL AND MILITARY DIVING TRAINING

COMMERCIAL AND MILITARY DIVING TRAINING

DCI offers customised training, assistance and consultancy solutions in Spain or abroad. Objective: support development of capacities and competences in military or professional diving.

In Spain, DCI training courses take place in a Centre for Military Diver Training near Valencia, on the Mediterranean Sea.

All Diver training is based on the know-how of the Spanish armed forces and on long experience in professional diving.

Training covers:

- use of military and professional diving equipment under water;
- operational use of equipment in the sectors of competence of the Spanish forces.

Military and professional diver training covers the full range of specialties, which are mostly military:

- fleet diver, rescue swimmer-diver;
- mine clearance diver;
- Special Forces diver.

Training takes place in Spain and/or at the customer's facilities and includes:

- classroom teaching (theory);
- underwater diving activities using different types of equipment, to a depth of 80 metres and more;
- on shore and underwater handling of munitions with explosives;

- use of specific equipment: hyperbaric chamber, underwater tools, sonar, vessels...
- Emergency First Response, Medic First Aids...
